TOMUS LIII—1989—53. KÖTET

Abe, N.—Nemoto, H.—Yamaguchi, S., On general connections satisfying $\nabla I = \omega \otimes I$ .... 255—266
Aerts, M.—Callaert, H., The accuracy of the normal approximation for U-statistics with a random summation index converging to a random variable ..... 285—394
Arocena, R., Generalized Toeplitz kernels and dilations of intertwining operators. II. The continuous case ..... 123—137
Assiamoua, V. S. K., $L_1(G, A)$-multipliers ..... 309—318
Assiamoua, V. S. K.—Olubummo, A., Fourier—Stieltjes transforms of vector-valued measures on compact groups ..... 319—327
Chajda, I., Modifications of congruence permutability ..... 225—232
Chō, M., On the joint Weyl spectrum. II ..... 381—384
Callaert, H., cf. Aerts, M. ..... 385—394
Daróczy, Z.—Kátai, I., On additive functions taking values from a compact group ..... 59—65
Дашдорж, Ц., Неприводимые правые правоальтернативные представления ..... 237—244
Ésik, Z., On α_1^2-products of automata ..... 245—253
Guyker, J., On reducing subspaces of composition operators ..... 369—376
Girstmair, K., Über multiplizitätenfreie Permutationscharaktere ..... 51—58
Hatvani, L., cf. Jianhong, W. ..... 267—285
Huhn, A. P., On the representation of distributive algebraic lattices. II ..... 3—10
Huhn, A. P., On the representation of distributive algebraic lattices. III ..... 11—18
Jianhong, W.—Hatvani, L., On the boundedness of solutions of nonautonomous differential equations ..... 267—285
Kátai, I., cf. Daróczy, Z. ..... 59—65
Kérchy, L., Injection of shifts into contractions ..... 329—338
Kisielewicz, A., On composition of idempotent functions ..... 217—223
Lausch, H., Endliche Loops und ihre Unterloopverbände ..... 207—216
Leindler, L., Notes on approximation by Riesz-means ..... 295—300
Luedeman, J. K., Congruences on semigroups of quotients ..... 33—42
Magyar, Z., On commutatibility and spectral radius property of real generalized *-algebras ..... 339—343
Magyar, Z., A caracterization of (real or complex) Hermitian algebras and equivalent C^*-algebras ..... 345—353
Nakazi, T., A spectral dilation of some non-Dirichlet algebra ..... 119—122
Nemoto, H., cf. Abe, N. ..... 255—266
Nevai, P.—Vértesi, P., Convergence of Hermite—Fejér interpolation at zeros of generalized Jacobi polynomials ..... 77—98
Nevai, P.—Totik, V., Orthogonal polynomials and their zeros ..... 99—104
Olubummo, A., cf. Assiamoua, V. S. K. ..... 319—327
Ong, S. C., Reflexive lattice of operator ranges with more than one generator ..... 183—185

Pietschmann, F.—Rhodius, A., The numerical ranges and the smooth points of the unit sphere ..... 377—379
Pirillo, G., Two finiteness conditions for finitely generated and periodic semigroups ..... 233—236
Popescu, G., Models for infinite sequences of noncommuting operators ..... 355—368
Putman, C. R., Generalized projections for hyponormal and subnormal operators ..... 187—190
Rhoades, B. E., The point spectra for generalized Hausdorff operators ..... 111—118
Rhodius, A., cf. Pietschmann, F. ..... 377—379
Röschel, O., Symmetrische Schrotungen im reellen dreidimensionalen projektiven Raum 67—76
Runk, P. O.—Szabados, J.—Vértesi, P., On the convergence of the differentiated trigonometric projection operators ..... 287—293
Sasvári, Z., Characterization of locally bounded functions with a finite number of negative squares ..... 319—327
Stochel, J.—Szafraniec, F. H., On normal extensions of unbounded operators. II ..... 153—177
Szabados, J., cf. Runk, P. O.—Vértesi, P. ..... 287—293
Szafraniec, F. H., cf. Stochel, J. ..... 153—177
Székely, Z., On maximal clones of co-operations ..... 43—50
Szűcs, J. M., Some uniform weak-star ergodic theorems ..... 179—182
Takahashi, K., On the reflexivity of contractions with isometric parts ..... 147—152
Totik, V., cf. Nevai, P. ..... 99—104
Trotter, P. G., Relatively free bands of groups ..... 19—31
Vértesi, P., cf. Nevai, P. ..... 77—98
Vértesi, P., cf. Runk, P. O.—Szabados, J. ..... 287—293
Walsh, S., Noncyclic vectors for the backward Bergman shift ..... 105—109
Wu, P. Y., Contractions quasisimilar to an isometry ..... 139—145
Yamaguchi, S., cf. Abe, N.—Nemoto, H. ..... 255—266

Bibliographie

Approximation Theory, Tampa. — N. H. Bingham—C. M. Goldie—J. L. Teugels, Regular Variation. — H. G. Dales—W. H. Woodin, An Introduction to Independence for Analysts. — Dependence in Probability and Statistics. — L. Devroye, A Course in Density Estimation. — Differential Geometry, Calculus of Variations and their Applications. — H. Edelsbrunner, Algorithms in Combinatiorial Geometry. — Field Theory, Quantum Gravity and Strings. — Field Theory, Quantum Gravity and Strings II. — F. Forgó, Nonconvex Programming. — S. Gallot—D. Hulin—J. Lafontaine, Riemannian Geometry. — M. Göckeler—T. Schücker, Differential Geometry, Gauge Theories, and Gravity. — Lj. T. Grujic —A. A. Martynyuk—M. Ribbens-Pavella, Large Scale Systems Stability under Structural and Singular Perturbations. — J. C. Kiefer, Introduction to Statistical Inference. — A. Kertész, Lectures on Artinian Rings. — S. Lang, Calculus of Several Variables. — R. Mañé, Ergodic Theory and Differentiable Dynamics. — B. Maskit, Kleinian Groups. — Nonlinear Equations in Classical and Quantum Field Theory. — Nonlinear Semigroups, Partial Differential Equations and Attractors. — Numerical Analysis. — T. Oda, Convex Bodies and Algebraic Geometry. — N. H. Pavel, Nonlinear Evolution Operators and Semigroups. — Probability Theory and Mathematical Statistics. — Probability Theory and Mathematical Statistics. — M. Roseau, Vibrations in Mechanical Systems. — K. T. Smith, Power Series from a Computational Point of View ..... 191—206

G. M. ADELSON-VELSKY—V. L. ARLAZAROV—M. V. DONSKOY, Algorithms for Games. — B. A. BARSKY, Computer Science and Geometric Modeling Using Beta-splines. — M. BERGER—B. GOSTIAUX, Differential Geometry: Manifolds, Curves and Surfaces. — K. H. BORGWARDT, The Simplex Method. A Probabilitic Analysis. — CAAP'88, 13th Colloquium on Trees in Algebra and Programming. — G. S. CAMPBELL, An Introduction to Environmental Biophysics. — Classic Papers in Combinatorics. — U. DUDLEY, A Budget of Trisections. — Dynamics of Infinite Dimensional Systems. — Foundations of Logic and Functional Programming. — M. GORESKY—R. MACPHERSON, Stratified Morse Theory. —. GRÖTSCHEL—L. LOVÁSZ—A. SCHRIJVER, Geometric Algorithms and Combinatorial Optimization. — J. L. KELLEY—T. P. SRINIVASAN, Measure and Integral. — N. KOBLITZ, A Course in Number Theory and Cryptography. — M. KOECHER, Klassische elementare Analysis. — P. KOOSIS, The Logarithmic Integral. — H. KRISHNA, Computational Complexity of Bilinear Forms. — F. KRÖGER, Temporal Logic of Programs. — Y. T. LYUBICH, Introduction to the Theory of Banach Representation of Groups. — E. MÄKINEN, On context-free derivations. — Mathematical Foundations of Programming Language Semantics. — Particle Physics. — S. J. PATTERSON, An Introduction to the Theory of the Riemann Zeta-Function. — E. M. POLISHCHUK, Continual Means and Boundary Value Problems in Functional Spaces. — Recent Developments in Mathematical Physics. — Recent Topics in Theoretical Physics. — Rewriting Techniques and Applications. — P. RIBENBOIM, The Book of Prime Number Records. — J. L. G. SANZ—E. B. HINKLE—A. K. JAIN, Radon and Projection Transform-Based Computer Vision. — J. SMITAL, On Functions and Functional Equations. — J. SONG—J. YU, Population System Control. — STACS 88. — Topics in Operator Theory, Constantin Apostol Memorial Issue. — S. WIGGINS, Global Bifurcations and Chaos. — E. ZEIDLER, Nonlinear Functional Analysis and its Applications ..... 395—413

Livres reçus par la rédaction ..... 415—416
